

COULD IT BE

If you are:

- ✓ **A First Nations person, 30 years of age or older living in the NT, outside of the Greater Darwin region ****
- ✓ **Anyone 70 years of age or older, regardless of risk factors and with or without symptoms.**
- ✓ **Anyone 60 years of age or older, with 1 additional risk factor ****
- ✓ **Anyone 50 years of age or older with 2 additional risk factors** or have had past COVID 19 infection resulting in hospitalisation.**
- ✓ **Anyone aged 18+ and have a sick or slow immune system or have had a past COVID-19 infection resulting in hospitalisation.**

****Living in the NT, outside of the Greater Darwin region is considered a risk factor.**

You may be able to start COVID-19 oral medications straight away, after testing positive.

This could help you get better, sooner, and may even keep you out of hospital.

Talk to your clinic today.
